Speakers' Abstracts

Peter del Strother

Aspects of the Geology of Bhutan

The talk will focus on the non-batholithic leucogranite and its relationship with the country rock. It will also illustrate an example of the impact of metamorphism on a basaltic sill.

Mary Howie

The Geology of the Pembrokeshire Coast - Graptolites, Red Rocks and Healing Springs!

A look back at an MGA field trip a few years ago.

Martin Haywood

Geology of the Julian Alps (Slovenian Triassic)

Photographic illustrations and description will feature of notable landscape features, rocks, minerals and fossils from a 10 day traverse of the valleys, summits and passes. The Triassic limestone geology will be described where possible and known. The tectonic setting and formation of the Julian Alps will be described in context and illustrated as currently understood.
